

## Short profile

Name: Meracle

Medical field	Pulmonary
Product type	Connected Care; Medical Devices, Diagnostics and Therapeutics
Growth stage	Proof of Concept
Team	2 people

### Description of product:

Meracle developed the Whizz, a simple, intuitive and convenient solution to improve the management of chronic respiratory conditions by increasing the efficiency of medication delivered into the lungs while tracking intake data to augment the management and assessment of treatment outcomes. The Whizz is the only solution in the market that addresses technique and compliance at the same time, solving the challenges faced by 7 in 10 patients, who struggle with ineffective and inconsistent inhaled medication intake.

### Desired project goal: *Please also elaborate on the primary outcome*

Meracle would like to test-bed the Whizz at Charité and validate the device's utility in the German healthcare system. The trial will encompass working with clinicians and nurses in specialist or primary care, to implement the Whizz in their current workflow, quantify clinical and health economic benefits and collect feedback from users and stakeholders.

Meracle seeks collaboration from specialist or primary care providers, such as pulmonologist, Respirologist or Allergist who treat and manage patients with moderate to severe asthma.

### Desired project type: *Please also elaborate on the following points, if applicable: population, intervention, study design etc.*

Clinical and performance evaluation
